

**James Madison University Department of
Integrated Science and Technology Testing 2014**

In a soon to be published university study, it was concluded that the Nonox Fuel Emulsion System dramatically reduced Nitric Oxide and smoke (opacity) emissions without impacting fuel economy. The unit tested was a Mack CX tractor equipped with a fully automatic Nonox Fuel Emulsion System. The truck has successfully logged nearly 100,000 highway miles running on the clean burning Nonox System.
